World Leaders in RC  
Power Supply Systems

## IF YOU'RE THINKING OF BUYING A PRO-CLASS RADIO, THINK AGAIN.

Many high-end fliers are thinking of moving to a new brand of pro-class radio, and here's one more thought: **PowerBox** Radios.

That's right. The brand known world-wide for extreme high quality, high reliability power delivery systems and fine accessories will, at the right time, be releasing a pro-class radio.

Since our acquisition of a German radio company in 2015, we've been working feverishly on developing the new system that'll protect your valuable modeling investment, like all our current products.

And with new technology that promises more than three times the range, telemetry that really works, and the only manufacturer in the world to be ISO9001 certified, well, it's certain to be worth it for those who wait.

Look for our website to reveal more details as to how you can be flying a radio that you'll be truly proud to own.
